

PUBLIC NOTICE of FORESTRY OPERATIONS

January 2020

In the World Collection at Golden Valley Tree Park there is a 8ha stand of Radiata Pines which will be partially harvested this summer using new FPC standards that reduce fire risk during pine operations.

While this area is being harvested it will be closed to all visitors and livestock for safety reasons.

The rest of the World Collection will remain open to visitors.

This “Hidden Valley” is remote from current walk tracks and is rarely used by visitors.

However over the next eighteen months the remaining trees will be cared for and new interesting trees planted, as well as an additional new walk track developed to introduce this Hidden Valley to future Tree Park visitors.
