

GOLDEN VALLEY TREE PARK

World Collection

Australian Collection

The World Collection maintains the "English Park" tradition, wide spaced trees with grazing in between; the trees have room to express their full crowns, the spaces creating vistas in which they can be appreciated.

The Australian Collection aims to represent some of the great diversity and landscapes of this continent. From tall forest trees of the gully to open woodlands on stony hilltop laterite soils, rainforest trees, native Pines, Sandalwoods and Kurrajongs tell some of the stories.

The Pine Forest will be managed on a longer rotation than the surrounding plantations. Thinning will allow other species to be gradually introduced.
